

Environmental and Quality Philosophy

“We, the Yoshida Group, strive to respond to our customers’ design needs while pursuing comfort and beauty as a plastic molding and decoration manufacturer. We advance high-quality ‘manufacturing’ that considers the Earth’s environment, while working for the use of resources sustainably and the conservation of biodiversity.”

- Environmental Policy -

1. We will comply with laws and regulations, procure materials in line with environmental needs such as the non-use of prohibited substances, and strive to prevent environmental pollution.
2. We will maintain a conscious balance between high operational efficiency and low environmental impact, aiming to raise awareness among all employees.
3. We constantly strive to reduce “waste” in the workplace.

- Quality Policy -

1. We strive for product design, material selection, and process management that prevents the generation of defective products.
2. We promptly respond to complaints and quality improvement requests received from our customers, aiming to prevent the recurrence of issues.
3. We conduct proper calibration and maintenance of tools and equipment used, establishing an efficient and stable manufacturing environment.

This environmental and quality policy will be thoroughly communicated to all employees of the Yoshida Group and those who work with us. It is also available to the general public.
