

Our ISCC PLUS Quality Policy

While complying with relevant laws and regulations, we are deeply aware of the need for environmental conservation on a global scale, also, we strive to reduce our environmental impact and contribute to improving the sustainability of global society.

In accordance with the ISCC principles of ecological, humanitarian, social and economic requirements, as one of the practical means of achieving this, we maintain, manage, operate and regularly strive to continuously improve our ISCC PLUS quality management system and formulate, evaluate, and review related regulations and do this regularly and strive to continuously improve the system. This ensures the traceability of ISCC PLUS certified plastic materials and that plastic materials and with which made products, thus increasing rate of recycled or biomass materials.

In addition, we do not commit fraud such as multiple accounting in accordance with ISCC requirements.

Our ISCC PLUS Quality Objectives

1. We properly maintain, manage and operate our ISCC PLUS quality management system.
2. We aim to produce at least one product per year that uses ISCC PLUS certified plastic materials, and aim to have at least 10% of the recycled materials and biomass materials used be ISCC PLUS certified plastics.
